

nora[®] pads

Periodic cleaning

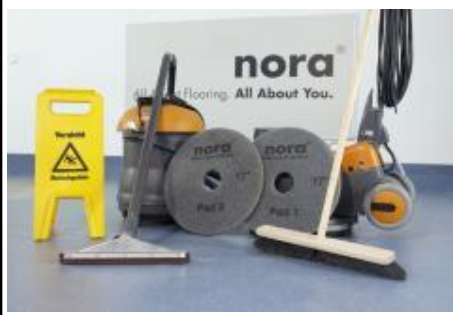

nora[®]

1. Make sure that the area to be cleaned is marked with warning signs.

2. Mop or vacuum the floor before cleaning.

3. Use the nora pad 2 with a side-to-side machine for this cleaning.

4. Place the pad underneath the machine with the printed side facing upwards.

5. Damp mop the area to be cleaned with clear water.

6. Now clean the floor thoroughly using circular movements until all the dirt has been removed.

7. Make sure that the floor always stays wet!

8. After cleaning, vacuum any residual water.

9. Place the pad 1 underneath a high-speed machine (1200 – 1500 rpm) with the printed side facing upwards..

10. Damp mop the area to be polished with clear water.

11. Polish the floor until it has dried and acquired the desired sheen brightness.
