

nora[®] pads

Initial cleaning

nora[®]

			
<p>1. Make sure that the area to be cleaned is marked with warning signs.</p>	<p>2. Vacuum the floor before cleaning.</p>	<p>3. Use the nora pad 1 with a side-to-side machine for this cleaning.</p>	<p>4. Place the pad underneath the machine with the printed side facing upwards.</p>
			
<p>5. First wet mop the area to be cleaned using clear water or a suitable cleaning agent (see cleaning recommendations).</p>	<p>6. Now clean the floor thoroughly using circular movements.</p>	<p>7. Make sure that the floor always stays wet!</p>	<p>8. After cleaning, vacuum any residual water and finish by mopping the floor with clear water and allow it to dry.</p>

This initial cleaning has to be followed by the step „enhanced shine“.
