

NOR 755 Datasheet

The NOR 755 uses a silicone bubble with three 'fingers' that align against the door to create an acoustic barrier. Once fitted the product has invisible fixings due to the push on cover.

Key Benefits

- Dual air pocket technology to increase acoustic performance.
- Ultra soft silicon bubble to minimise open / closing forces (Doc 'M').
- Energy efficient.

Fitment Location

Head and jambs of single action doors.

Seal Material

Silicone Rubber with aluminium holder.

Fixing

Supplied with wood screws. Aluminium holder is pre-drilled and slotted to allow for adjustment.

Colour(s)

Gasket - silver. Holder - satin anodised.
Cover - silver.
