

NOR788

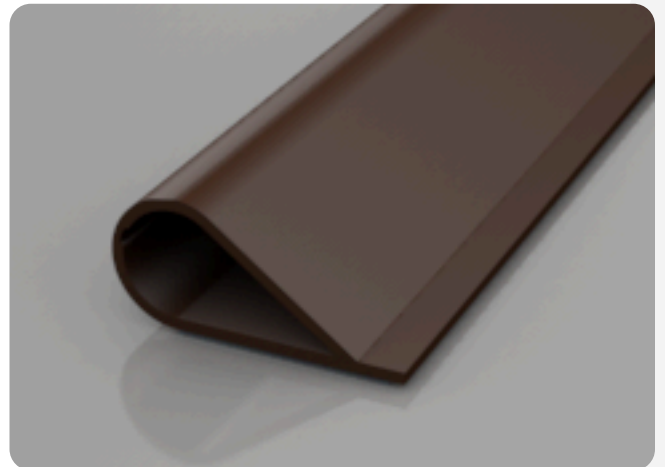

DATASHEET

The NOR788 is an adhesive-backed bulb silicone gasketing product installed on the perimeter of a door opening to slow / prohibit the passage of smoke, fire, weather, sound and dirt.

The NOR788 is an excellent solution for controlling air infiltration or where sound attenuation is required. It can also be installed on any exterior door application requiring protection from weather conditions to minimise heat loss and drafts.

The self-adhesive backing should be installed on a clean, dry and cured surface and can be fitted on the door stop or rebate. It is important to verify tolerances between the door and frame.

NORSOUND

KEY BENEFITS

- Acoustic seal
- Compression bulb absorbs closing impact
- Low closing forces
- Durable and long lasting

FITMENT LOCATION

Head and Jambs

RECOMMENDED GAP SIZE

Seal begins compressing at 6.35mm, compresses to seal up to a gap 1.5875mm

SEAL MATERIAL

Silicone rubber

FIXING

Self-adhesive, surface mounted

STANDARD LENGTHS

100mtr coil

APPLICATION

Single and double leaf doorsets

COLOURS

Dark brown
