

VariGroove

DATASHEET

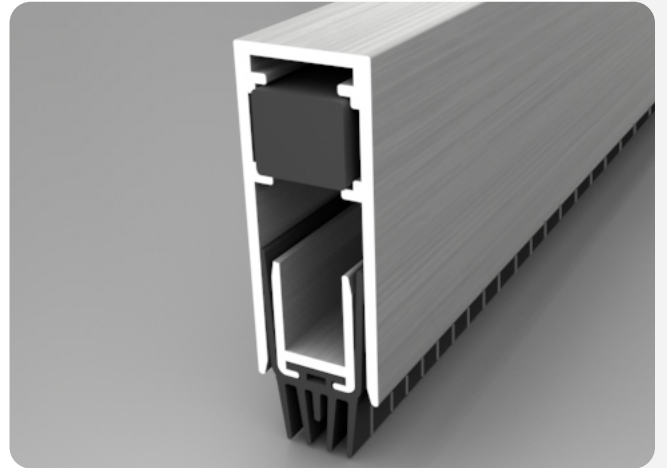

The first acoustic drop down seal to have real adaptability!

VariGroove is the first drop down seal to fully take on the problem of uneven floors.

VariGroove has a very unique feature; the base of the blade is cut into narrow 'curtain' style strips. Each one acting independently of the next, there are four full banks of seals per unit.

VariGroove has been tested with BS EN ISO 140-3 1995 and shown to have similar results to the NOR810 range of seals. VariGroove would not outperform our standard range in a laboratory but on uneven ground this seal will win all day long!

NORSOUND

KEY BENEFITS

- Sound reduction
- Protects against smoke
- Any floor surface
- Self levelling
- Light weight operation
- Unobtrusive

SIZE

Height: 14mm, Width: 35mm

MATERIAL

Holder: T6063 grade aluminium
Insert: TPE

FIXING

Rout-in retro fit. Adjust with spring loaded plunger

LENGTHS

385mm, 515mm, 655mm, 795mm,
935mm, 1075mm, 1215mm

COLOUR

Holder: SAA
Insert: Black

CUT BACK

Trim to suit

MAX DROP

15mm
