plug and play

1. Power socket
2. Data blank (for unused data socket)
3. Data socket (for use with RJ45, USB, HDMI, Audio)
4. Fixing nut
5. Fixing collar

OE Electrics' PIXEL design has been driven by the demand for a small accessible but discreet unit for the more discerning office worker. Fitting neatly into a standard 80mm cutout by means of a simple screw on nut (no need for tools!) PIXEL takes up almost no room at all. You may even forget it's there until you need it.

Cables from PIXEL can be fed directly into the desk's existing cable management allowing simple integration.

PIXEL will accept eight+ different plug socket nationalities including UK, Schuko, French, Swiss, Italian and Danish. With two data apertures to facilitate RJ45, USB, Audio or HDMI, PIXEL will ease desktop

connectivity and assist compliance with the Disability Discrimination act by improving accessibility to power and data.

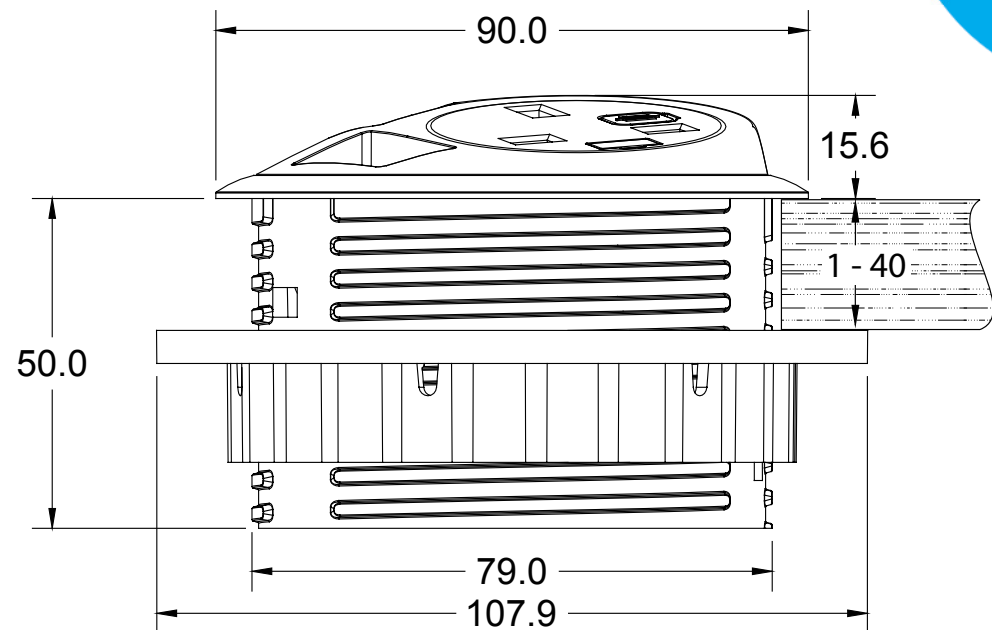

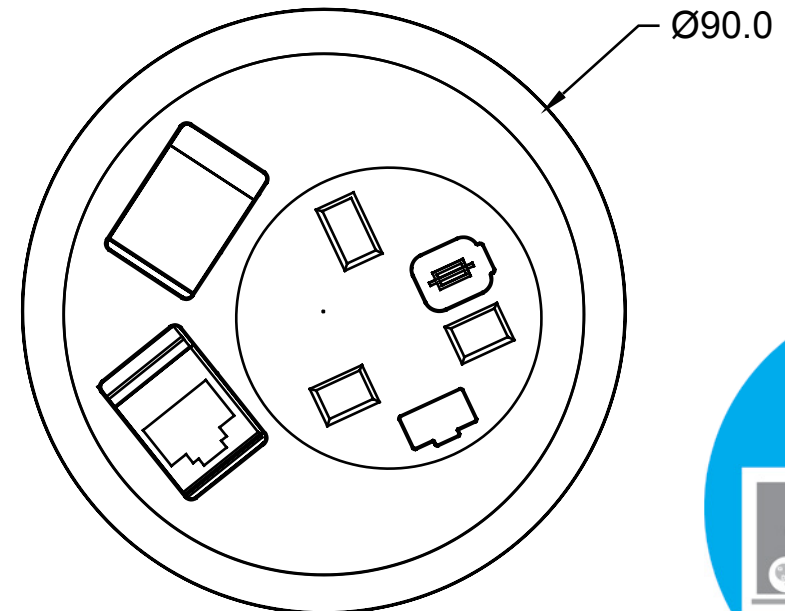

PIXEL's unique design allows compliance with BS6396, and the sweeping organic curves ensure better protection against liquid ingress.

fit my pixel!

pixel

To fit PIXEL into your desk couldn't be simpler. If your desk already has an industry standard 80mm hole* simply take the fixing nut off your newly purchased PIXEL, feed the cables through the hole and gently slide your PIXEL into place. Make sure your PIXEL is facing the desired direction and screw the fixing nut back on until it is firmly in place. PIXEL will fit any surface from 1mm to 40mm.

All dimensions in millimeters

pixel
plug and play

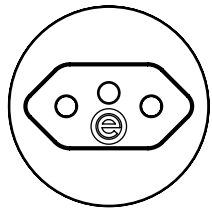

PIXEL becomes part of the picture allowing you true connectivity whilst complimenting your workstation.

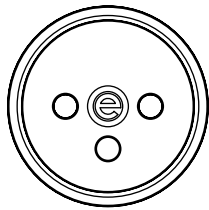

As a power point PIXEL delivers simple elegance. Add data connections to that and you have the perfect solution.
