

Compact Height Adjustable Bath

The Compact Plus bath comes with an integrated powered seat, lap strap and nursing arms ensures that the bather is transferred safely and comfortable.

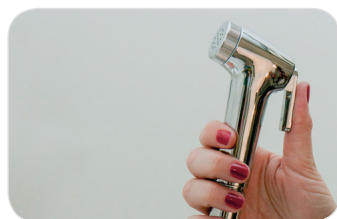

The Unique 'Slipper' shaped bath tub cocoons the bather and offers one of the most spacious internal dimensions in a bath of its kind. In addition, its height adjustable feature and robust GRP hoist access panels ensure that the carer can work in a comfortable position whilst minimising manual handling risks, resulting in them being able to assist the bather safely and efficiently.
