

## ORLINERCT - Recessed Trimless Linear Light

### Description

This linear lighting product offers the perfect solution for locations that require robust and versatile fixtures. Designs can provide isolated individually spaced modules, continuous lines of light or custom shaped configurations for feature lighting. Recessed, surface mounted and suspended versions available. Featuring integral tridonic control gear and CRI>80 to ensure light quality. Bespoke configurations available upon request - for example corner, square, rectangular and cross shapes.

**Do not connect battery supply until 220/240 A.C. supply is permanently fed and lamp fitted. Allow 24 hours charge before running lamp in emergency mode.**

### Dimensions

### Fixing Details

### Specification

Chipset	TRIDONIC SMD Chipset
Voltage	110-240V
Driver	Integral - Tridonic PSU
Dimming Options	Switched; DALI (DT6); DSI; SwitchDIM; Corridor Function
Constant Current	500mA
Beam Angle	120°
Binning	3 Step MacAdams Ellipse
Emergency	3 Hour Maintained Emergency (Minimum length 1160mm)
CRI	>80
Finish	White - (RAL9016) (Bespoke RAL Colours Available Upon Request)
