

VOC Emissions

EN 14041:2004 VOC EMISSIONS REFER TO FORMALDEHYDE CONTENT

When formaldehyde-containing materials have been added to the product as part of the production process, the product shall be tested and classified into one of two classes; E1 or E2.

The test requirement does not apply to floor coverings to which no formaldehyde-containing materials were added during production or post production processing. These need not be classified, but may, without any testing, be declared as E1

No formaldehyde-containing materials are added during the production process, or post production, to Paragon products, and as such can be declared as E1 without testing.
