## Office Visions

At Office Visions we offer the complete solution when it comes to office design, therefore when it came to the design and co-ordination of our own new offices that we recently moved into, it had to be right.

When considering a supplier for flooring for our new offices we sought to support British Manufacturing as well as achieving an innovate design that was vibrant and dynamic for our business environment.

Office Visions chose Paragon for their varied range of products. The Strobe and Codec ranges particularly, gave us a choice of diverse designs which created striking breakout areas using boards which were used to create perfectly co-ordinated office space and showrooms. We utilised the Toccarre range due to its great value for money and suitability for a demanding office environment.

Due to our rapid expansion, the time scales were tight. Paragon was involved from the initial planning of the scheme through to the delivery, and arrangements were made to ensure that the stock was available on the shelf and delivered at a time that suited us.

Ian Venables : Contracts Director  
Office Visions (Wales) Ltd

Product : Mix Products  
Client : Office Visions  
Flooring Contractor : Office Visions
