BOILER SOLUTIONS

**IMPORTANT INFORMATION**

Complete boiler flue  
inspection kit as required  
by 'GAS safe'

# INTRODUCTION

Pendock are the UK's leading manufacturer of preformed pipe boxing and boiler casing solutions. Pendock's reputation for both quality and service is renowned and its products are used in numerous applications and market sectors. Pendock's preformed pipe boxing provides a versatile and practical solution to the problems of concealing unsightly pipe work.

Pendock's Boiler Pipe Casing Solutions are perfect for the replacement of existing boilers as well as new boiler installations where there is a need to conceal boiler pipework.

The Pendock Boiler Flue Inspection kit is a simple solution to the new GAS safe regulations and the requirement for access to the flue by a GAS safe engineer.

## PENDOCK BOILER INSPECTION KIT BENEFITS

- ✓ Incorporates airtight access panel for flue inspection
- ✓ Pre-formed – No need to cut Ply/MDF on site
- ✓ Pre-Finished – No need for on site decoration
- ✓ 65% Quicker to install than site made alternatives
- ✓ Quality uniformed finished on every installation no matter how big or small
- ✓ Fits all standard flue kits by major boiler manufacturers
- ✓ Easily cut to required depth and height
- ✓ Can be extended by using additional inspection kits

➔ Flue Inspection is now a legal requirement

# BOILER FLUE INSPECTION KIT

## PENDOCK BOILER FLUE INSPECTION KIT

In October 2008 The Health and Safety Executive (HSE) issued a safety alert to raise awareness of a potential risk from a particular arrangement of flues for gas boilers that are located on internal walls and which may have a flue that requires boxing in.

If the flue has not been installed correctly or has fallen into disrepair, then this could affect the performance of the boiler. If the boiler is not working correctly this could then result in carbon monoxide entering any void through any faults in the flue and into the living space, placing occupants at risk.

Any new boiler should be installed in line with the new legislation, this legislation also affects any existing boiler installation.

Pendock Boiler Flue Inspection Kit consists of MX 200 x 300 x 1250mm long, airtight access panel 150 x 230mm, jointing strip and relevant fixings.

BEFORE

## PENDOCK BOILER FLUE INSPECTION KIT

GAS safe registered engineers need to be able to inspect the flue - which takes fumes away from the boiler - as part of essential safety checks whenever the boiler is worked on. A flue in poor condition, combined with a boiler that is not working properly, could put people in danger from carbon monoxide poisoning which can cause death or serious injury.

From the 1st January 2013 any GAS safe registered engineer will turn the boiler off until he can clearly have access to inspect the flue in the appropriate places.

➔ Pendock Boiler Flue Inspection Kit provides quality boxing solution

## PENDOCK BOILER FLUE INSPECTION KIT

Pendock Boiler Flue Inspection Kit provides a fast and effective solution to comply with the new GAS safe legislation and the requirement to have access to the boiler flue. The Kit incorporates a 150 x 230mm airtight access panel which clips out to give easy unobstructed access for the GAS safe engineer to inspect the flue.

Pendock Flue Inspection Kit is sized to accommodate the most popular flue length of 1 metre. The kit includes a jointing strip to increase the length with an additional kit should this be required. The kit can also be easily cut on site to the required overall length.

The kit includes all the fixings to make installation quick and easy. The Pendock Boiler Flue Inspection Kit is pre finished in hard wearing white melamine, making it extremely easy to clean and no need to paint.

# BOILER CASINGS

## BOILER PIPE CASINGS

Pendock Boiler Pipe Casings compliment any boiler replacement or kitchen refurbishment programme. Our Boiler Pipe Casing offers full and easy access to the underside of the boiler to allow for annual Gas Safety checks, as well as being a practical and simple solution to hiding ugly pipe work below and above the boiler. Why waste time and money with site made solutions, often resulting in a poor quality finish.

## BOILER PIPE CASING OPTION 1

### ➔ One Piece No Joint

High quality Boiler Pipe Casing finished in a white high pressure laminate. With no visible joint the product offers an unrivalled quality of finish which will complement any new boiler installation to the highest of standards.

**200mm deep x 400mm wide** available in **500mm high** sections.

For larger projects/schemes the Boiler Pipe Casing can be supplied in 2500mm or 3000mm lengths for on-site cutting. Bespoke sizes are available to suit individual site requirements.

# BOILER CASINGS

## BOILER PIPE CASING OPTION 2

### ➡ One Piece Joint

Robust aesthetic one piece Boiler Pipe Casing finished in a hard wearing white melamine with decorative joint detail. This Boiler Pipe Casing offers a quality of finish which will complete any boiler installation and hide the ugly exposed pipe work in the most cost effective way.

**200mm deep x 400mm wide** available in **500mm high** sections.

For larger projects/schemes the Boiler Pipe Casing can be supplied in 2500mm or 3000mm lengths for on-site cutting. Bespoke sizes are available to suit individual site requirements.

## BOILER PIPE CASING OPTION 3

### ➡ Boiler Kit

Quality 3 piece boiler kit which gives additional flexibility on site to box in exposed pipe work above and below the boiler. Simple to put together on site, the kit offers a decorative boxing solution which will meet all budgets.

**200mm deep x 400mm wide** available in **500mm high** sections.

For larger projects/schemes the Boiler Pipe Casing can be supplied in 2500mm or 3000mm lengths for on-site cutting. Bespoke sizes are available to suit individual site requirements.

## QUALITY BOXING SOLUTIONS

The Pendock Boiler Flue Inspection Kit aswell as providing access to the flue as required by GAS safe also provides a quality boxing solution to hide the boiler flue.

The Pendock Boiler Flue Inspection Kit is also fully demountable for ongoing maintenance. Prefinished in hard wearing white melamine the kit looks at home in any environment.

## PENDOCK BOILER SOLUTION BENEFITS
