

GLAZING SPECIALISTS

## PERFECT CRYSTAL WINDOWS

Our company was established in 2001 and is based in London. It manufactures and installs all types of glazing products. We have been working within the double glazing industry for many years. We take on domestic and large commercial projects.

PCW provides high quality products and services. Our products meet all british requirements such as BSI and FENSA standards, and are certified.

Our showroom, admin department and factory are situated under one roof which enables better customer support - from picking the right product in our showroom to the installation of it.

Perfect Crystal Windows is the only manufacturer in London that has four production lines: timber, uPVC, aluminium and glass - this allows us to manufacture customers orders quickly, effectively as well as expedite production and orders.

We use CNC machinery to provide high quality products and offer competitive prices. All our products are bespoke to suit your property style and design.

## Windows

Our company offers the highest quality windows made from: uPVC, aluminium - slim and modern design and traditional timber.

You can pick the most suitable design for you.

We offer a variety of different profile colours and product ranges.

Our production lines are prepared to deal with the most complex requirements.

### CASEMENT WINDOWS

Caseament windows — that open outwards— are functional, practical and easy to use. Our windows are highly rated amongst other top competitors within the market. They also provide an option of a night vent and high security.

### BAY WINDOWS

Bay windows add extra space to your property and allow light to come through into your house. They are multi-segment - composed of standard windows with structural supporting posts between the frames.

### SASH WINDOWS

Traditional vertical sliding windows are very popular within the London area. You have choose from the traditional sash on weights / ropes or the non-traditional windows with springs. We also supply additional options including decorative horns, restrictors, tilt inside opening (for the purpose of cleaning).

# Doors

The security of your home and family is very important for us.

Our residential, french and patio doors come with the highest spec multipoint locks which give you a guarantee of safety and peace of mind.

Wide range of hardware and toughened glass allows us to offer solutions for every possible case.

Your new doors can be made from uPVC, timber, composite and aluminium.

## Front doors

Your front door establishes the aesthetic look of your property which makes it a very important part of your house. Doors supplied are glazed, with the option of design panels. We use toughened glass in our range for safety purposes. Extra accessories are available, including a range of letterboxes, knockers and house numbers.

## French doors

French doors offer a perfect way to open your house out onto your garden. To increase your security and safety, we use multipoint locks and toughened glass. Doors are supplied glazed, or with design infill panels and can be made in full range of colours. Our products comply with all current Building Regulation requirements.

## Patio doors

Sliding patio doors provide a wide opening out onto your garden. Our patio doors are designed as a heavy-duty sliding door system that can provide a number of different solutions for any project. Its tensile strength enables extra large glass panels to slide effortlessly, whilst maximising glass areas to provide uninterrupted framed views.

## Bifolding doors

Bifold doors allow your house to open out onto your garden. The range starts from 2 panel doors and goes up to 8 sections which can create a very wide opening. Our doors are fitted with a multipoint locking mechanism. We use toughened glass in our range for safety purposes and a low threshold cill for ease of access and superb aesthetics.

## 26 SLIM SLIDING doors

Elegantly bringing the outside inside, the 26 SLIM SLIDING doors are art with a purpose - quality, lightness and comfort. Its design implies a conscious effort to create an art object that is both functionally and aesthetically pleasing. Creative both in its design and in its effect on the building and the user, 26 SLIM SLIDING doors are contemporary architecture.

## Conservatories

One of the most popular products are conservatories. We can create any style conservatory of your choice.

Conservatories offer excellent use of internal space. It has a number of distinguishing architectural features, such as the bay front which gives it a curved shape while a steeply pitched roof and ornate ridge details lend to some style of conservatory a more classical appearance.

Perfect Crystal Windows makes conservatories made from uPVC, timber and aluminium with wide range of hardware colours.

## Lean-to roof

The Lean-To style is for those who prefer the clean, understated lines of a Mediterranean sunroom. Traditional or contemporary, this style is ideal for properties with limited space under the eaves, or an awkward area. The pitch of the roof is variable, so that a shallow pitch could fit under the low eaves of a bungalow, whilst a steeper pitch would patch the roof of a terraced or detached house.

## Lantern

Choosing a lantern-style roof ensures drama and style, echoing the grandeur of times gone by. The two-tiered effect adds a new dimension to your space and the extra ceiling height adds to the feeling of light and space. Lanterns are typically suited to older style period properties and are often chosen for swimming pool enclosures.

## Flat glass roofs

A slim aluminium powder-coated profile makes our skylights the best in the glazing industry. Choose between Clear or Satin toughened glass with a black border all the way around. Available with solar control glass and self cleaning. Different colours are also available.

## Walk-on-glass

Made from laminated toughened glass with a thickness of 25-50 mm, walk-on glass is safe and strong. When you want to bring light in to a basement, or any other enclosed area, walk-on glass is ideal. Choose from Clear or Satin glass, with a black border all the way around. Antislip and switchable glass is available as an option.
