Safer Grass Tiles shown

PSUR119-A-NA Rubber Play Mulch - Bonded

Rubber Play Mulch is a lower cost alternative to wetpour, for use in small areas. A 40mm layer onto a grass or soil sub-base can be used for high level equipment. For use in small areas only.

PSUR116-A-NA Safer Impact Grass Tiles

Grass can grow through the holes in the tile to provide a safer surface for high level equipment. For use in areas with light foot traffic.

PSUR137-A-NA Landscaping Slate

Slate is one of many landscaping aggregates available from Playforce to enable you to transform your grounds. Slate and other aggregates create visually stunning designs that provide increased play value through the use of varying textures and materials.
