

Wet Pour

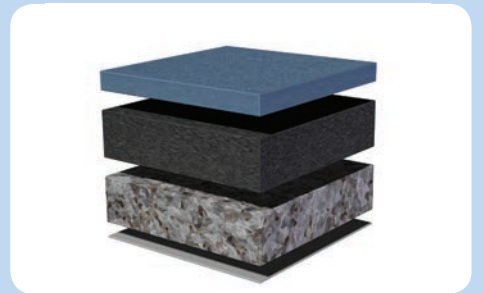

Range: Surfacing & Pathways
Code: PSURWP

Wetpour Overlay Tarmac - For low level equipment

Wetpour Overlay Tarmac - For high level equipment

Wetpour with Sub-base - For high level equipment on soil & grass

Wetpour is constructed from rubber granules combined with a bonding agent. The mouldable nature of the product allows for intricate shapes and contours to be created. Wetpour is available in a broad range of colours to create either natural or striking designs. The coarser under layer is made from recycled rubber.
