POLYROOF

ADVANCED LIQUID ROOFING

ULTRA-FAST SEAMLESS TECHNOLOGY

Polyroof are the UK's leading manufacturer of ultra-fast seamless cold-applied liquid flat roofing systems.

Common issues associated with roofs such as joint failure, persistent leaks, long installation times, and risks from hot works are not an issue with Polyroof systems. Every roof is completely seamless, encapsulated in a tough, long-lasting, and flexible membrane with no welds or weak points, even at bay joints or areas with complex geometry or detailing.

Our industry leading RapidCure membrane technology can be utilised as part of a Polyroof cold or warm roofing system, as well as with our PV solar cells or green / blue roof technology. We also supply extra low odour systems that are perfect for use in sensitive environments such as schools and hospitals.

Polyroof systems are BBA approved with a certified lifespan of at least 25 years, and are classified as BROOF(t4), the top fire rating achievable for a flat roof system. They are supported by comprehensive insurance supported guarantees for up to 25 years, with a range of options available depending on your projects needs and specification.

WE ARE THE FLAT ROOFING EXPERTS

Polyroof have been designing and manufacturing specialist cold-applied liquid flat roofing systems from our base of operations in North Wales since 1984. Our systems are specified and installed across the UK and beyond in a wide range of sectors and markets.

Alongside our industry leading technology, our reputation has been built on the high level of technical support provided to clients before, during and after every project.

Our expert team provide comprehensive training, guidance, and support on all aspects of flat roof design and installation. Detailing, fire performance, embodied carbon... the list goes on.

Let us worry about your roof so you don't have to.

Our in-house R&D and sustainability teams help us stay at the forefront of the industry, allowing us to ensure we fulfil the needs of the present and the future in a sustainable, cost efficient, manner.

We have significant experience of working in the offsite/modular sector, with recent projects including state-of-the-art healthcare buildings, education buildings and sports centres. Amongst these many projects, one of our proudest achievements came when we worked with clients against the clock to construct multiple emergency COVID-19 wards.

SEAMLESS ROOFING SOLUTIONS

No matter the size, shape or complexity of a roof, Polyroof's liquid systems will form a seamless waterproof membrane across the entire roof area. No joints, no seams, no welds – no weak points.

The finished surface is tough, flexible and impervious to water. With proven lifespans in excess of 25 years, Polyroof systems are the number one choice for all modular construction projects.
