

Ennis-Flint® by PPG

Robur R-MMA

Area Markings

Coloured lane treatment

Road markings must be durable in high traffic areas

ENNIS FLINT® by PPG ROBUR coloured lane treatment is quick and easy to apply and cures fast in a wide range of temperatures. It also offers a range of application methods including screed/extrusion, profiled, and spray.

Robur coloured lane treatments provide clear delineation and increased driver awareness of dedicated and shared lanes, even in high traffic surroundings.

Formulation

Comprised of Methyl Methacrylate resins with hardwearing aggregates and premium pigments

Excellent durability and colour retention against UV rays

Installation

Quick and easy to apply

Applied in a variety of temperatures and climates using screed, spray, roller or squeegee

Can be applied on asphalt or concrete

Open to traffic in approximately 20-60 minutes

Key Benefits

Provides a slip-resistant surface for all road users

Increases awareness of shared roadway use

Compatible with Thermaline® preformed thermoplastic application

Variety of colours available

Certification

Facility is BS EN ISO 9001:2015 certified for design, development and manufacturing

BAST certification for Robur Screed and Spray

AETEC certification for Robur Spray
