

PRO-LONG HOARDING: Elevating Security, Sustainability, and Smart Construction Practices

ECO-FRIENDLY SITE HOARDING:

Pro-Long is an innovative hoarding system crafted from premium recycled plastic, offering an environmentally responsible and durable alternative to traditional ply or virgin plastics. Designed for strength, simplicity, and sustainability, it's a cost-effective choice for construction sites.

Pro-Long contributes to your BREEAM, CEEQUAL, and Considerate Constructor scores. This heavy-duty construction ensures longevity and reusability, reinforcing its position as the ideal sustainable alternative to timber hoarding.

KEY ADVANTAGES

- ✓ **Adaptable Fixing:** Versatile fixing options for foundation-free installation, catering to diverse site conditions seamlessly
- ✓ **Effortless Assembly:** Swift assembly, adaptation, and disassembly for seamless project adjustments and modifications
- ✓ **Corporate Branding:** Pre-finished in colors reflecting your corporate identity for a branded aesthetic
- ✓ **Flexible Install:** Offers both dug-in and surface-mounted options for versatile, foundation-free installations
- ✓ **Procurement Choices:** Options include purchase, short-term, and long-term contract hire for various project needs
- ✓ **Cost-Efficient Lifecycle:** Minimises total costs over the project lifecycle for economic efficiency

Proudly manufactured in the UK, Pro-Long reflects our commitment to local craftsmanship and quality.

**Reusable &
Recyclable:**

Pro-Long ensures zero waste with 100% recyclability and reusability, aligning with sustainable construction practices.

**Carbon
Neutral**

Featuring a closed-loop design, Pro-Long reduces the carbon footprint of your project.
