

PRO-SURE 358

Rigid mesh security fencing with small apertures, ideal for high-security applications, ensuring no climbing or cutting access.

Pro-Sure 358 High-Security Fencing is a robust mesh panel system designed to provide unparalleled security. Its unique 75 x 12.5 x 4mm 358 mesh configuration eliminates finger and toe holds, preventing climbing or cutting access. Approved by Secured by Design, this fencing is ideal for high-security installations where intrusion prevention is critical. Suitable for applications including prisons, data centres, utilities, airports, and industrial units. Complemented by matching prison specification gates, it provides a cohesive security solution across the entire perimeter.

This high-security fencing system is offered in multiple heights, and with its rigid structure and small mesh design, ensures utmost security while offering a visually appealing fencing solution.
