Surface Type	Description	
Integral Grit	Relinea's integral grit finish offers the highest degree of slip resistance ever measured for a walking surface. This standard surface is a fully sealed, integral Aluminium Oxide grit that offers optimum slip resistance in very wet or oily conditions.	
Meniscus	A concave surface is naturally formed during the manufacturing process. This grating is more suited to low traffic applications such as hygiene applications where a high standard of slip resistance is needed and ease of cleaning is a consideration.	
Smooth	This optional surface on grating is ideal in non traffic applications such as shelving, fences, machine guards and decorative screens. On our plate products this surface is ideal in applications such as cladding, hygienic lining, and fascia panels. This surface also comes with UV protection.	

<p>MINI & MICRO Mesh</p>	<p>Relinea offer a series of Mini & Micro Mesh products. The Mini Mesh consists of two mesh sizes: 25 & 19mm square mesh. The Micro Mesh is a 12mm square mesh which complies with the European 15 mm ball test requirement. This grating surface is ideal where wheeled traffic or trolleys are used.</p>	
<p>Conductive</p>	<p>Relinea can provide a secondarily applied conductive surface which drains off the buildup of unwanted, dangerous static electricity when properly grounded. The grating has an electrical resistance of less than 26 kilo ohms per 300 mm. Available with all resin types these gratings are used primarily in the high tech electronic industries, munitions, arsenal manufacturing plants.</p>	
<p>Chequer Plate</p>	<p>This optional finish can be supplied as a direct alternative to aluminium chequer plate. This product would only be suitable for use in dry areas with light traffic</p>	
<p>Leatherette</p>	<p>This surface is an embossed finish for use in applications which require an aesthetic look is required such as balcony panels.</p>	
<p>Brick</p>	<p>Relinea can offer a brick effect finished plate that can be done in any combination of 2 RAL colours to blend in the existing brickwork.</p>
