

Designed by Belén and Rafael Moneo, the shapes and forms take their inspiration from nature and suggest the flowing of water. Their cascading curves blend in with the walls and gently embrace each other, offering a modular system with interesting formal solutions. This collection opens up a new horizon of possibilities where interior design is concerned, exploring new relationships between the everyday objects in its environment.

Designed by
Belén y Rafael Moneo

Moneo is one of Spain's great contemporary architects and, together with his daughter Belén, works from Madrid on the creation of timeless designs which stay up-to-date over time. Amongst other awards, Rafael Moneo has won the Spanish government's Gold Fine Arts Medal and the Schock Prize awarded by the Schock Foundation and the Royal Swedish Academy of Arts.

Wall-hung vitreous china basin

Fixing kit: Included
Installation type: Wall-hung
Material: Vitreous china
Taphole configuration: 1 taphole in the middle

Colours and finishes

How to obtain the reference number
Replace the “..” with the desired finish code from the list below

00 White
