Daylight Flatglass

AN AESTHETICALLY-PLEASING AND COST-EFFECTIVE DAYLIGHTING SOLUTION

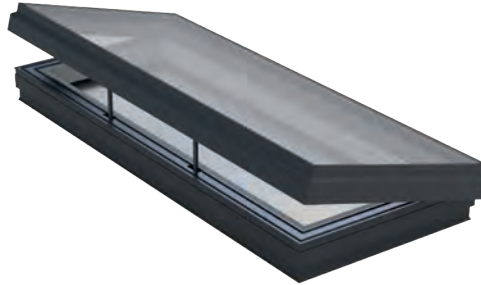

Our market-leading rooflight design means that daylight is maximised while the visible framework is minimised, resulting in a product that offers the best in both form and function.

- Single or multi-pane rooflights with double glazed, triple glazed and walk-on glass options available
- Bespoke shapes, sizes and glass specifications can be accommodated to suit your project requirements
- Flatglass Protect+ range available for Secured by Design and Part Q compliant rooflights
- U-values as low as 0.6 W/m²K

Ventilation Flatglass

A CONTEMPORARY NATURAL VENTILATION SOLUTION FOR MODERN HOMES

Our range of Ventilation Flatglass has been designed to provide you with all the benefits of natural ventilation and daylight, for improved well-being.

- Electric 24v or 230v hinged and sliding rooflights are available for increasing the circulation of natural, fresh air through living spaces
- Temperature, wind and rain sensors available for additional day-to-day comfort
- Range of switches and remote control options
- U-values as low as 0.6 W/m²K

Access Flatglass

FOR NATURAL VENTILATION AND EASY ROOF ACCESS

A sleek and contemporary, multi-purpose opening rooflight that offers an effective daylight solution, sufficient airflow ventilation and effortless access to roof terraces.

- Outstanding thermal performance due to its thermally-broken lid and frame
- Powered by two 24v actuators
- Temperature, wind and rain sensors available for additional comfort
- Easy to use, one-touch remote control options
- U-values as low as 0.6 W/m²K

Secured by Design

Police Preferred Specification

For extra peace of mind, Secured by Design and Part Q compliant Flatglass Protect+ rooflights are available

Pre-formed Timber Upstands are available to suit your Flatglass rooflights

All Flatglass rooflights can be supplied with Ritec ClearShield Eco-Glass™
