**SEAMLESS  
CLICK ACCESS**  
GIVES YOU THE EDGE

At Sa Solution s, we strive to constantly innovate by trying to listen to the everyday problems. Which are faced but never accepted as our customers new and old tell us which generally they have remedial s attached to them . Money and time then lost on your projects . With that in mind we would like to make you aware and introduce you to our new innovation the **Seamless Click Access panel**. Which we believe this new product can change the mind set to provide an application change within our industry . Current format of manufacture that has been utilised but never truly accepted as is fraught with practical and aesthetic issues . Just ask yourself are you happy with the norm if not read on **As know you must be asking yourself what is so different about our new product. !**

Simple using two of our patented technologies we are able firstly to create a perimeter from our Seamless Abutment product edge To allow the plasterboard to terminate. and become in essence the access panel frame. The element can be tape and jointed or skim finished seamlessly. Using these components there is no need for a metal frames , hinge mechanisms and complications that add weight and in terms of stress over time . Traditional constructions over time will no doubt crack out as bead sits on the surface and once finished The installation can only be blended but never finished truly flat . Surfaces show lumpy and really noticeable when direct sunlight hits the surface you will then see the problem described . Bead technologies are the past Seamless Abutment gypsum interfaces are the only application that will provide you with the peace of mind of zero remedial. Our mag bloc technology then provide s the connection to attach the Inset door panel . Utilising a standard plasterboard but with pre-wrapped edges this solution panel literally becomes a throw away element. The connections are magnetic which attracts to the ceiling construction already in place . Demounting the panel becomes the most simplistic and free from remedial operation . We achieve this utilising our Seamless click access tool to disengage and remove the insert panel from the ceiling . Say goodbye to budget locks and bead interfaces and welcome money and time back in yours and your clients pocket again.

# INSTALLATION
