

TECH LINE

OPENBOX

The perfect pocket door system for plasterboard.

ROBUST, EASY TO HANDLE AND COMPATIBLE WITH ACCESSORIES.

DURABILITY

20-year guarantee on the entire product.

The hanger system is tested to withstand over 100,000 cycles whilst its 120kg load capacity offers a 20% increase over the competition

RIGIDITY AND ROBUST CONSTRUCTION

The structure is twice as rigid as a closed box. The hanger can withstand a static load of up to 400kg. 10 horizontal reinforcements. Continuous lower base. Patented anti-release relief panel.

ACCESSORY COMPATIBILITY OF TRACK

Patented "double level" track system for simple installation and adjustment of accessories without having to remove it even after it has been installed.

SMOOTH-SLIDING HANGER

Less than 2kg effort to slide open and shut with 20% higher loading capacity than its competitors, thanks to the hanger with 4 bearings with 7 balls.

LIGHT WEIGHT AND EASY TO HANDLE

Up to 50% lighter than the closed box.

CARRYING CAPACITY

The open pocket door system with the highest carrying capacity on the market, up to 120 kg even in standard configuration (20% more than its main competitor).

EASY INSTALLATION

Designed to guarantee extra easy installation thanks to: insertion of the base in the 75 profile; pre-drilled reinforcements; additional T-piece; front fixing spring; rear friction spring to prevent vibrations; open structure enabling easy installation.

SUSTAINABILITY

70% PEFC certified product.

Tests conducted by accredited Institutes.

SCRIGNO

TECH LINE

OPENBOX

Available in pre-assembled or kit version.

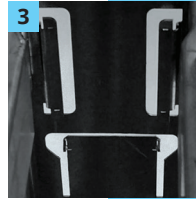

DOUBLE LEVEL TRACK

The new double level track is an exclusive Scrigno patent and allows easy installation and maintenance of accessories.

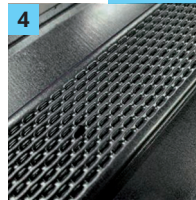

HANGERS

Capacity of 120 kg.

LOCKING SPRING

Patented by Scrigno, making it simple to insert the track into the crosspiece.

10 HORIZONTAL REINFORCEMENTS

Ensures the structure is stronger.

SYSTEM TO PREVENT THE DISLODGE- MENT OF THE REINFORCEMENTS

Exclusive Scrigno system to ensure the quick and easy fixing of the reinforcements to the structure. The Scrigno system prevents the reinforcements from being dislodged.

FLOOR GUIDE

New adjustable floor guide installed without drilling the floor.

LOWER BASE

Helps to create the finished open box making the frame more robust.
