Key

① Decaflex Top Coat applied in strict accordance with Sika Plastics Project Specification

② Decaflex Embedment Coat with Reemat Premium GFM

③ Existing substrate prepared and primed in strict accordance with Sika Liquid Plastics Project Specification

④ Decaflex Waterproofing System dressed on to prepared primed upstands, terminated in the protected junction between upstand and coping; once cured, seal with Sika Liquid Plastics Polyurethane Sealant.

⑤ Underside of the coping need not be coated to prevent sagging of the Embedment Coat and Reemat Premium prior to curing

⑥ **OPTIONAL:** Decaflex Waterproofing System dressed over soundly adhered, prepared and primed existing copings; system terminated on the external drip edges of the existing coping

This drawing is solely intended to illustrate the correct application of Sika Liquid Plastics products and systems, it must be read in conjunction with the appropriate specification and current issue of relevant Technical Data Sheets. All elements bearing reference to structural and/or thermal design are shown indicatively and **should not be used** in whole or in part for any aspect of project design without consulting the relevant authorities.

For refurbishment projects, all aspects of the existing roof are deemed to be fully compliant with **BS 6229:2003** [Code of Practice for Flat Roofs with Continuously Supported Coverings] or improved upon for instances where these standards are not met.

Site-specific details not covered by our range of Standard Details can be obtained by providing relevant information to the email address shown.
