

Decorative And Project Fabrics

It is our policy to continuously update our fabric ranges in order to be at the forefront of design and technical innovation. This brochure only attempts therefore to give you an overview of what we have to offer. We recommend that you view the actual fabric collections in our showroom or ask one of our Territory Managers to visit you. Samples and collections are also readily available.

Silent Gliss offers two main fabric collections. Each fabric is clearly marked for its suitability for different window treatments.

Inspiration

A luxurious collection of fabrics for exciting window treatments. Get Inspired.

The Project Collection

A comprehensive collection of flame retardant technical fabrics mainly for roller and vertical blinds but many can also be used for Panel Glide, Roman blind and Wintergarden systems.

Venetian And Pleated Blind Collection

To complement the extensive fabric range offered by Silent Gliss, there are two additional collections for Venetian and Pleated blinds

The Venetian Collection

A wide selection of aluminium and wood slats in various widths for either domestic or contract use.

The Pleated Collection

A vast and colourful collection of fabrics for Silent Gliss Pleated blind systems

In addition, several of our innovative and stunning window treatments either require or look great with specially selected fabrics.

Wave®

Wave XL

Panel Fold

Inspiration

A luxurious collection of fabrics for exciting window treatments.

Silent Gliss presents a fabric collection for your home. Selected with care in regard to design and textures but also intensively tested to ensure that they work perfectly on various defined window treatment systems, we are sure that these fabrics will inspire you.

Finest translucence suggested by thinnest Trevira, rich linen or traditional cottons offer cool and natural looks.

Inspiration introduces new fabrics to complement the Silent Gliss established and long proven fabric range. These new fabrics bring new textures and colours, together with exciting new patterns. You will find digital prints, laser cut-outs and embroidery work confirming our aim to be your partner for all creative and striking ideas for your window treatments.

The fabrics are presented in two inspiration books, one with plain fabrics (Inspiration 1), the other one featuring various textures, prints and patterns (Inspiration 2). A compact user-guide helps you in your selection and gives the necessary information for each fabric and its applications.

Get inspired.

The Project Collection

As the name implies this collection is aimed mainly at commercial users. The emphasis is on functional and solar control fabric with specific technical qualities but many of them will be equally at home in today's high tech domestic environments especially if there are large, glazed areas. Primarily roller and vertical blind fabrics are covered but many are also well suited to Panel Glide, Roman and conservatory blinds.

As a further service we offer the facility to print company logos and other digital pictures onto blinds.

The Venetian Collection

Not fabrics of course but part of today's window treatment range

In aluminium there are over 60 colours in 25mm slats of which many are also in minimalist 15mm. A smaller range of 50mm is available and also perforated 25mm.

In wood there are nine 'natural' wood colours and a further nine stained or painted. With or without wide fabric tapes.

The Pleated Blind Collection

This attractive fabric range for use with Silent Gliss Pleated Blind systems offers an array of colours and patterns from subdued to wild. There are over 50 styles to choose from including fabrics with blackout and aluminium backing for heat reflection. All fabrics have a 20mm pleat.

Wave® and Wave XL Curtain Heading System

With Wave® and Wave XL, Silent Gliss has developed a unique heading system which turns traditional curtains into a striking contemporary design element. Used in conjunction with our metropole range of decorative curtain poles and available in a vast range of styles from minimalist to traditional – the curtain hangs in delightful undulating waves and functions perfectly, even on bay windows. The system can also be supplied on functional white aluminium tracks or motorised. Whilst Wave® and Wave XL can be used with many fabrics, Silent Gliss have carefully selected a special range of fabrics which hang perfectly. Made-to-measure.

Panel Fold

Panel Fold is the unique new window treatment from Silent Gliss. A stunning visual experience - is it a blind or a curtain? It is both functional and decorative, affording the exact degree of privacy you require. Because of the nature of the system there will always be a gradual fold on the panel when closed but Silent Gliss has chosen a special range of fabrics which will minimize the fold effect whilst still offering a wonderful choice of opaque or translucent fabrics.

Vertical Wave

A new and very contemporary look with the exclusive Vertical Wave louvres. There are three laser cut vertical blind designs (Annika, Maria and Andrea) each reflecting the modern architecture of today. Vertical Waves are available exclusively with Visiotex fabric available in a wide range of colours.

Vertical Waves – Design Maria

Customer's Own Fabric Roller Blinds

Our custom laminating service means that we can take almost any soft furnishing fabric you send us and give it a special backing to make it suitable for use as a roller blind.
