

Video Conference Room

Video conference rooms provide local and remote participants with a very rich audio and video experience, so they can meet to share ideas and collaborate without geographic limitations. These rooms feature one or two high-definition video displays, easy one-touch meeting start, and contact list and room calendar on the touch screen controller.

Benefits

- › Simple .AV Framework™ setup and UX
- › One-touch Microsoft Skype® for Business video or audio conferencing and presentations
- › Integrated room control of AV, lights, shades, and thermostats
- › Network room scheduling and Crestron Fusion® Cloud management
