VISIPOINT

Visitor Management

Introduction to VisiPoint

VisiPoint is a self-service, self-managed Visitor Management System designed to streamline the entire process of greeting, vetting, directing and managing visitors, contractors, and staff coming to your premises.

Our devices are created by a team of award-winning digital developers, combining self-service platforms and kiosk hardware to create hard-working solutions that improve productivity and save resources in high-footfall public locations across the globe. VisiPoint offers a range unparalleled features and an unprecedented return on investment.

We manufacture our own hardware through our accredited European and Asian factories. We believe product quality is paramount, and our assurance & approval policies ensure only the highest standards are met throughout development, production and application processes.

VisiPoint is one of the only solution providers able to design and develop both hardware and software in-house; allowing for bespoke feature design with dedicated project and support teams who provide a personal approach and exceptional performance.

VisiPoint work with your organisation to ensure our commitment to new technologies provide relevant, worthwhile solutions to your needs.

"The days of printing fire registers are gone; we can access the evacuation list from a phone or tablet."
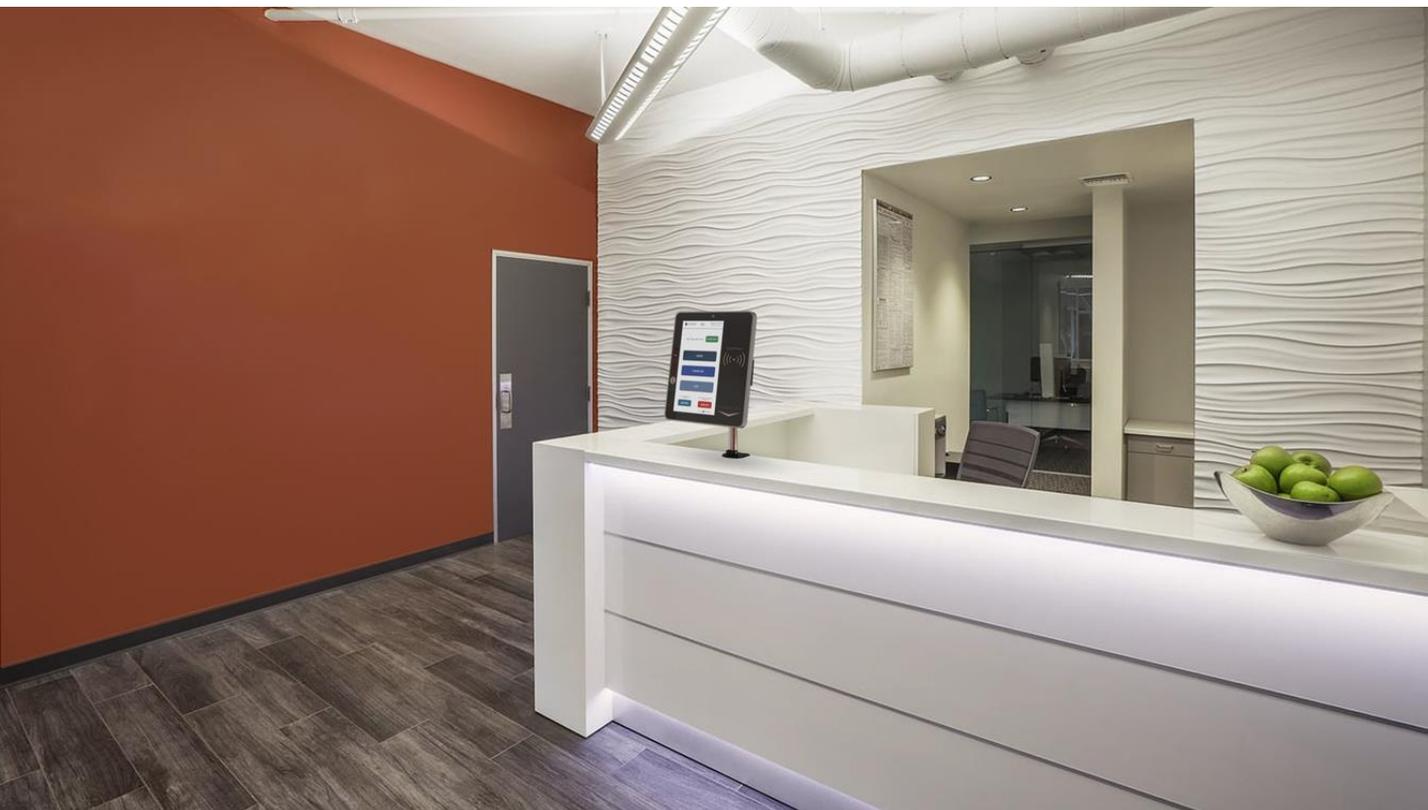

VisiPoint - The Hardware

VisiPoint comes in two forms: Tablet and Kiosk.

VisiPoint Tablet is designed as a compact all-in-one terminal, allowing for flexible installations.

It features a bright 13.3" touch screen display, HD camera, built-in barcode scanner and card reader, desktop badge printer and works with wifi or wired connection.

The VisiPoint Tablet can be positioned on a desktop or a wall with the supplied modular mounting kit - consisting of a table-top stand, desk clamp and wall bracket.

The PC module is integrated into the VisiPoint Tablet, meaning no external devices are required for it to work. Simply plug it in, connect to the internet and start welcoming visitors!

VisiPoint - The Hardware

VisiPoint Kiosk is suitable for 24/7 use with upgraded anti-vandal features and logo branding.

With a toughened 19" touch screen display and the highest-quality integrated components; the VisiPoint Kiosk is the benchmark in unattended visitor management solutions.

This floor-standing terminal acts as a central point for anyone coming to, or going from, your site. The badge printer, camera and scanners are built-in the kiosk, giving a fully 'all-in-one' design that's durable and maintenance-free.

Add your logo to the front of the kiosk for personalised branding, or leave it blank for a clean and simple design that will compliment

VisiPoint Tablet & Kiosk hardware is designed and manufactured in-house, using the highest-grade components on the market.

VisiPoint – The Software

VisiPoint includes an intuitive visitor interface on the tablet or kiosk terminal and an all-inclusive management dashboard that's web-based for desktop or mobile use.

Visitor Interface

VisiPoint's self-service interface - which is presented on the Tablet or Kiosk terminal at reception – designed for welcoming, vetting and signing-in visitors to your premises.

Signing-in is made quick and easy with the intuitive visitor interface, which guides the user through the entire registration and vetting process efficiently and effortlessly. Visitors and contractors are asked to enter their details, agree to the relevant terms and conditions, have a photo taken and collect their automatically printed ID badge. On exit, visitors simply need to scan their badge to instantly sign-out. If a badge has been lost or damaged, there's a manual process to sign-out or reprint as necessary.

Add your logo, site terms & policies, access areas and required certification (eg. asbestos register, DBS check etc.) with just a few clicks, while all other information (staff details, repeat / pre-registered visits, courier companies etc.) automatically appears on-screen thanks to a real-time connection with your VisiPoint management dashboard.

"I have much more time to complete other tasks now that I'm not being interrupted to produce visitor badges."

VisiPoint – The Software
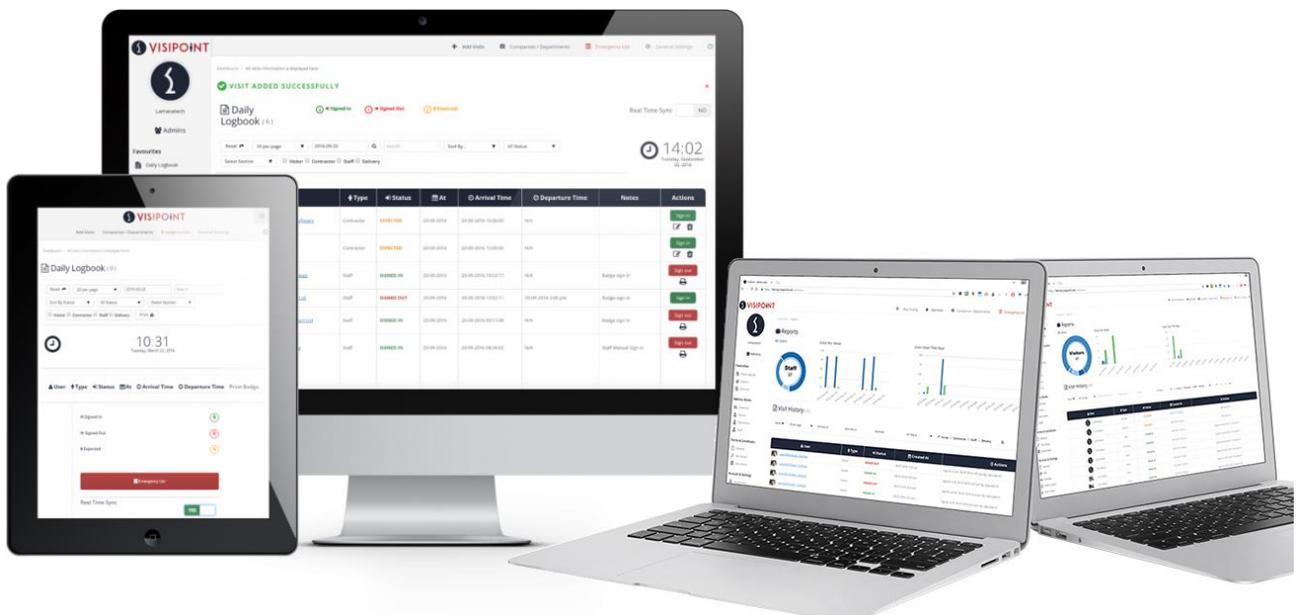

Management Dashboard and Reporting

Monitor, record and control all vital visitor data with the VisiPoint management dashboard. You can also manage all staff, contractors and deliveries too.

Pre-register your visits or track new visitors once signed in via the self-service touch screen terminal. Insert notes about the visit or include important security details alongside the visitor's record.

Powerful search tools allow filtering of past and present records by name, company, car registration, visit type and date.

The management dashboard is cross-platform, which means you and your team can monitor and manage your premises from any laptop, tablet or mobile device. Just log-on securely through your web browser and access the VisiPoint system from anywhere, any time. Individual sign-in accounts for each centre managerwith the correct privilege.

The management dashboard gives you the ability to generate real-time reports for staff, visitors and contractors in few seconds. Pull up time sheets and attendance records instantly, making tasks such as cross-checking invoices for contractor services and creating staff time & attendance reviews a breeze.

"I spend less time compiling reports, a couple of clicks and my report is done. Every centre should have VisiPoint!"

VisiPoint – Hardware Integrations

If you currently use Key-cards or Fobs for door access, VisiPoint can make use of them and allow your staff to sign in and out using their current card/fob in a matter of seconds.

VisiPoint - Multiple Entrances/Buildings

Have you got more than one reception area, multiple entrances or more than one site? With VisiPoint we will provide the solution that works for you!

Option 1 - We can install as many VisiPoint touchscreens as your budget will allow. The touchscreens would all be linked to the same dashboard, enabling you to see exactly what's happening in each location from a centralised dashboard.

Option 2 - If your budget doesn't stretch to multiple touchscreens, you have the option to sign users in/out manually via the same dashboard as your VisiPoint tablet from any connected device .

VisiPoint comes with free lifetime software upgrades. When new features are added, you'll receive them at no additional cost.
