

SMART. SIMPLE. SUSTAINABLE.

A chair intelligent enough to understand how you sit, and adjust itself intuitively. A chair thoughtful enough to measure, and minimize, its lifelong impact on the environment. It's almost as if the chair could think.

In 2004, Think was quickly lauded as a breakthrough innovation, becoming a global bestseller. The first Cradle to Cradle certified product in the world, it created a higher sustainability standard across industries. Think, through an insightful redesign, redefines Smart, Simple and Sustainable design.

IM#: 13-0003208

SMART

Think senses what your body needs. The Integrated LiveBack™ System conforms to your body and moves with you as you change postures, plus it features an advanced weight-activated seat, so anybody can get comfortable.

SIMPLE

Think is easy to use. The intelligent design allows the user to personalize their comfort through a few manual adjustments, but they don't require a manual to explain.

SUSTAINABLE

Think has measured and minimized its life long impact on human and environmental health. Think also disassembles quickly with common hand tools for easy recycling, and Steelcase can help you reuse or recycle the chair at end of its useful life.

SUSTAINABILITY

PEOPLE. PLANET. PROFIT.

By rethinking our business systems and designing our products to avoid negative impacts on humans and the environment, we contribute to a sustainable future for the planet and its people. We commit to advance our practices through continuous learning and building partnerships with our customers, business partners and environmental thought leaders to optimize our performance and contribute to the science and practice of sustainability.
