### Initial Washing

Products	Fila Cleaner diluted 1:20 for medium dirty floors.
Equipment	Single-disc professional cleaner with red disc and vacuum drier.
Procedure	Initial cleaning is of fundamental importance to remove the residues left by the installation process and building-site dirt. Wash with Fila Cleaner (diluted in twenty parts water) with the aid of a single-disc professional cleaner and vacuum drier. The initial cleaning can also be done by hand with a floor cleaning brush and cloth. In this case you are recommended to rinse the cloth in the detergent solution often. Ensure the floor is rinsed thoroughly with clean water.
Coverage	FilaCleaner 1 L per 50 m <sup>2</sup>

### Protecting Indoor Floors

Products	FILA MP90 for natural effect stain proofing treatment
Equipment	Flat brush
Procedure	Apply one coat of undiluted protector FilaMP90. Allow 24 hours to dry.
Coverage	Fila MP90: 1 L per 15-20 m <sup>2</sup>

### Routine care of indoor surfaces

Products	Fila Cleaner
Equipment	Cloth or mop. Floor cleaning machines for large areas
Procedure	For routine care, wash the surface with Fila Cleaner diluted depending on the level of dirt. When highly diluted (1:200) it does not require rinsing. When diluted 1:200 this product can be used with a floor cleaning machine.
Coverage	FilaCleaner 1 L per 1500 m <sup>2</sup> if diluted 1:200
Note	To revitalize the shine occasionally apply a water-diluted solution of the same wax used for the finish
