Standard 16mm multiwall polycarbonate with 10yr guarantee against discolouration from sunlight.

> Streetseal™ Aluminium Glazing System

4 part rubber and aluminium fixing and sealant system for maximum durability and weatherproof cover for the long term.

> Rainwater

PVC Guttering and Downpipes.

Product Overview :

An attractive and cost effective system for your external corridors, the Taurus walkway™ is constructed using European redwood which is treated for a 25year service life for ultimate strength, appearance and durability. Galvanised steel baseplates prevent rot through ground contact and galvanised brackets are used at all connections. The wall-mount version gives fewer obstructions where suitable wall fixing points exist and also reduces the groundwork costs.

Taurus walkway™ Dimensions :

- > Unlimited length in spans between support columns from 2500mm up to 4000mm.
- > Spans within width of canopy from 1500mm up to 4000mm Canopy Cover.
- > Canopy height to suit your requirements - standard eaves beam clearance of 2400mm.

Product Options :

- > Coloured polycarbonate roof cladding choice.
- > Aluminium guttering and downpipes powdercoated to RAL colours.
