

PROVEN PERFORMANCE

BLUESCAPE HOMES, HORNBY

TOPFLOW

Product Topflow
Client Bluescape Homes
Main contractor Oaklea Design & Build
Location The Meadow, Hornby
Date of completion 16/09/2016

Bluescape homes are a new account that Tarmac approached on site, they have 9 large houses to build.

THE CHALLENGE

Bluescape intended on using a power floating mix which would have resulted in them taking more time to lay the concrete with more men. They would then have needed to hire a power float machine and would have had to wait for the concrete to go off before they could have carried out the power floating.

OUR SOLUTION

Tarmac recommended Topflow, self compacting concrete to Bluescape and shown them several videos of successful slabs that have been supplied to customers. They offered on site support for the first slab along with the use of their tools. Tarmac explained that Topflow can be poured and completed in 30 to 45 minutes on a house slab. The customer was very interested and decided to give Topflow a try.

RESULTS AND BENEFITS

Shaun Dainty from Oaklea was very impressed with the Topflow and was surprised at how smooth the finish was. They didn't have an account with Tarmac previously, but have now decided to open one for future orders. Shaun has continued to place orders for the rest of the slabs at Hornby, on behalf of Bluescape Homes. The Director of Bluescape homes, Mr Ian Beardsworth is extremely happy with the results.
