

Duct Panelling

Whether it's for easy service access to pipe work or simply for use as stunning wall panelling, Amwell's Duct Panels are beautifully versatile

Our duct panelling is available in a variety of materials including MFC, HPL, SGL and Real Wood Veneer.

We also have 3 different service options to suit your individual project requirements, panel only, panel and frame or you can choose supply and install. Turn over to find out more.

Variety of access options including hinged lockable panels

For use to conceal cisterns

Easy service access

Urban cubicles in Charcoal with Plum duct paneling

Duct panelling

Versatile and practical, our ducting is available as a panel only system, a pre-assembled metal frame system, Panel&Frame, or choose supply and install*

Duct panelling does more than just conceal pipe work and services. It completes the washroom look and feel.

With our ducting the look is further enhanced by the minimal flashgaps between panels. And that's only possible because unlike 'one size fits all' panelling our ducting is tailor made to specific site dimensions.

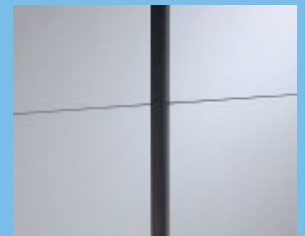

Our flexible duct panelling is available in MFC, HPL, SGL or luxurious real wood veneer.

For dry, low traffic environments MFC is the perfect option. If your washroom is more heavily used then specify HPL which is heat, scratch and impact resistant. Or choose SGL for high impact or wet environments such as shower areas.

Panels can be standard height, floor to ceiling or low level, and there's a choice of concealed panel fixings to allow easy access.

Square edge panel detail with matching horizontal flash gap**

Square edge panel detail with contrasting flash gap

Post formed panel detail with contrasting flash gap

* framework option for supply and install dependent on site programme

** Panel only

Access panels

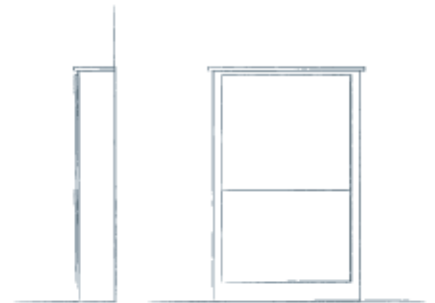

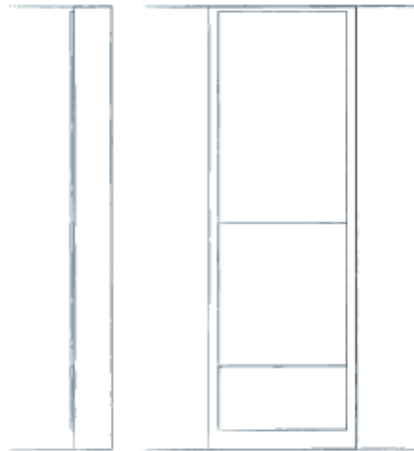

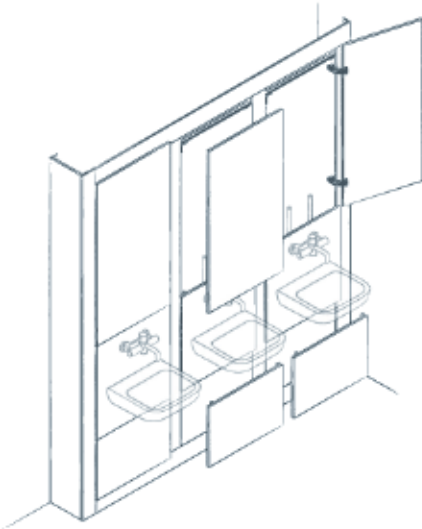

Panels can be mounted using either concealed 'push fit' or 'lift off' brackets. Panels can be hinged if required. Lockable access panels are available for added security

Full height ducts

Suitable for WC's, urinals and wall hung wash hand basins, the number and size of the panels in each set are manufactured to your requirements

It is advisable to consider the size and weight of access panels for maintenance purposes in line with Construction Design and Management Regulation (CDM) requirements

Low level ducts

Available with the option of a removable lid/shelf panel
