

## E-SCOOTER RACK

Simple, Compact & Secure Storage for E-Scooters

The E-Scooter Rack offers a simple and space-saving solution for storing scooters securely in both indoor and outdoor environments. Designed to meet the growing demand for micromobility infrastructure, the rack allows users to safely lock scooters by the frame, helping reduce clutter in public spaces, schools, offices, and residential developments. Manufactured from high-quality mild steel and hot-dip galvanised to BS EN ISO 1461:2022, the rack is built for long-term durability and daily use. A choice of stainless steel or polyester powder-coated finishes ensures it can be tailored to suit any setting. With its compact footprint and modular design, the E-Scooter Rack can be installed as a single stand or scaled up to meet larger capacity requirements.

- › **Durable Construction:** Manufactured from UK mild steel, hot-dip galvanised to BS EN ISO 1461:2022
- › **Finish Options:** Galvanised, stainless steel, or polyester powder-coated in any RAL colour
- › **Space-Saving Design:** Compact footprint ideal for areas with limited space
- › **Flexible Capacity:** Stores and secures multiple scooters; scalable for larger projects
- › **Secure Locking:** Allows frame locking for improved theft prevention
- › **Versatile Installation:** Suitable for indoor or outdoor use across multiple environments
- › **Sustainability:** Made in Britain and BREEAM compliant
- › **Warranty:** Backed by a 10-year manufacturer's warranty against defects
