

# THE BIKE STORAGE COMPANY

## PAD Contracts - Semi Vertical Rack Case Study

The Bike Storage Company were approached by PAD Contracts for the cycle storage requirements on their latest housing association project. Following an on site consultation with director Alastair Worldige and project designer Andrew Whiting, PAD Contracts were supplied with a full design pack including comprehensive product and layout drawings. The project consisted of 294 spaces spread across 12 separate rooms and was designed to ensure full compliance with BREEAM and Code For Sustainable Homes. Upon approval of the design pack manufacture commenced following the quality control timeline.

PAD contracts were subsequently provided with site specific risk and method statements. Installation of Semi Vertical Racks was completed within 3 days leading to the project being completed from design – manufacture and installation within 3 weeks.

“The Bike Storage Company provided a very professional service from design to installation, we are looking forward to the next project.” Colin Ayres – PAD Contracts
