**Product(s)**  
Glass Flat Panel Heater

## Project overview

This stunning conversion and extension to Ramsgate's old Police Station provides a seamless and sympathetic renovation which cleverly combines the old with the new. The development consists of 87 luxury apartments in the heart of the town centre with only a short walk to the Royal Marina and only a one hour commute to London.

A requirement for stylish and efficient glass flat panel heaters was identified to compliment the premium specification of the apartments. With ultra flat glass design, touch LED display, smart control and Lot 20 compliance, the glass flat panel heater was the perfect fit for modern day living. Additional features include:

- Eco 50% energy mode
- 24/7 programmable heating schedule
- Open window detection
- Overheat, tip over and anti frost protection
- Manual temperature setting

In total 527 glass flat panel heaters of varying outputs were installed across 87 high-end apartments.
