

## Arena Symphony

### Tailor made suspended architectural service raft incorporating fluorescent direct/indirect luminaire designed to comply with BB93 standards

- Slim profile acoustic panel design, suspended below ceiling, minimises sound reverberation within the space, making it suitable for standard secondary classrooms without additional sound absorption baffles to the walls or ceilings
- The sophisticated optical design provides efficient light output (>77%) with glare control within suitable limits for modern classrooms and display screens
- Available in 2200mm length by 850mm wide, with 600mm and 1000mm wide available to order
- Infill panels of 500mm provide additional spacing or acoustic performance if required. Can also be used for intergration of additional services (e.g. PIR's, PA speakers or fire detection equipment)

Photographs, line drawings and photometric data are representative only. For specific product detail please select an individual product.

96239263

### Material/Finish

Body: steel, white (close to RAL 9010) perforated  
 Louvre: high reflective Satinbrite aluminium  
 Diffuser: reeded curved polycarbonate

### Installation/Mounting

Suspended panels/luminaires are mounted by four point wire suspension (supplied) in continuous line mounting with infill panels where required. Rear of body channels provide cable tray for other services. Luminaires, infill panels and junction modules are pre-wired with plug and socket for quick connection.

### Specification

To specify state:

Continuous lighting and services raft including T16 (T5) direct/indirect luminaire in white with performance louvre, asymmetric reflector or diffuser optics and acoustic panels to aid BB93 and EN12464 compliance. Mounted individually or in continuous lines, fixed output or addressable digitally dimmable control gear with 3 hour manual test or SelfTest/Addressable test emergency function.
