

Elastaseal™ HD Gutter System

System data sheet

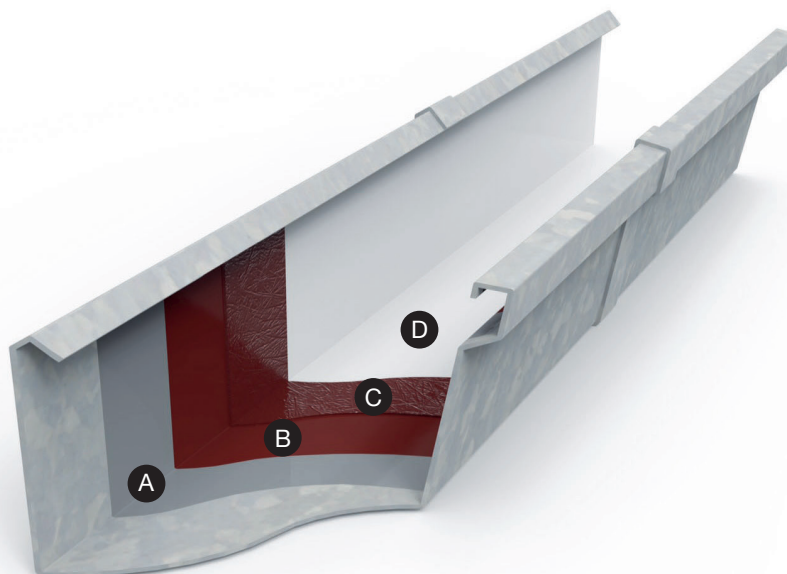

Providing Practical Solutions

Typical system

- A** - Primer
- B** - Elastaseal™ Embedment coat
- C** - Elastamat™ reinforcement*
- D** - Elastaseal™ HD top coat(s)

* Applied into the wet embedment coat

What does it do?

The Elastaseal™ HD gutter system provides long-term waterproofing to all types of gutters.

It lasts for up to 10 or 20 years before first full maintenance, depending upon the system specified.

Product Appearance

Smooth, plain colour, mid-sheen finish.

What does the system include?

Primer	Designed to promote adhesion. Primer selection determined by gutter type.
Buildcoat	Elastaseal™ Fibretex used to provide added reinforcement to joints prior to application of embedment coat.
Embedment Coat	Elastaseal™ embedment coat is developed to enable easy embedment of Elastamat™ glass fibre reinforcement mat.
Topcoat	Elastaseal™ HD Top Coat is an extremely durable heavy duty finishing coat, which has excellent weathering properties / UV stability.

System features

- Heavy duty gutter waterproofing system
- Compatible with all gutter types
- High solids for long lasting protection
- 10 and 20 year systems available
- Quickly resistant to rainfall
- Permanently elastomeric
- Joint free
- Excellent resistance to ponded water
- Fibre reinforced for maximum film strength
- UV stable
- Excellent through life costings

How to specify

Due to the high number of possible substrates and varying conditions in which they can be found, we strongly recommend that a site survey is carried out to determine the exact specification required. Our team of Area Business Managers and in-house Technical Support team are available to answer your queries, conduct site surveys and prepare project specifications. Contact us for more information.
