

TG Secure™

Manual Attack • Anti Bandit • Ballistic & Bullet Resistant • Blast & Explosion Resistant

Toughglaze offer an extensive range of security glass composites to meet all levels of contemporary threats from criminal attacks to terrorism. These conform and exceed the highest required regulatory standards and performance requirements.

This range of technically high-performance products are visually indistinguishable from other types of laminated glass yet their wide range of sizes, enhanced optical clarity and minimal displacement is achieved without imposing extra weight or thickness to the composite panels.

Our products have outstanding resistance to penetration by accidental or forced means, the TG-Secure® is offering new opportunities to the full spectrum of the security requirements.

This innovative range of high-performance products can also be designed and tailored to client's bespoke requirements and can be combined with our full range of products including **Fire rated, Acoustic, Switchable-LCD glass, Decorative Glass Laminates, Screen and Digitally Printed Glass.**

Please refer to our technical data sheets for further details.
