

### What is the Flipfix Fitting Device?

There is no longer the need to brace or support the structural opening, and no extra screws or glue required. You simply follow the fitting instructions, close the door and walk away.

A construction project requiring 300 number 600mm x 600mm Access Panels would **save up to 40 hours on fitting time** Compared to traditional Access Panels when using FlipFix. That amounts to reducing the time spent on site by one whole week, which should hopefully reflect in future tender submissions.

Pros & Cons	Traditional	FLIPFIX	Plastic

## What is the RapidFit Hinge System?

The RapidFit sliding hinge system allows the quick and easy removal of the Access Panel door from the frame.

This allows the frame to be fitted into the structural opening easily and safely. The Access Panel door can then be replaced into the frame by aligning the hinge pins and clicking them into place.

This panel has been tested and can save you up to **30 Minutes per panel** on fitting times when compared with an 1800 x 600mm RapidFit and a traditional Access Panel.

-  RapidFit Hinge System
-  Available up to 2 Hour Fire Rated
-  Available Smoke Tested
-  Available Acoustic Rated
-  Available Airtight
-  Available Picture Frame
-  Available Beaded Frame
