

**Easy Install Flipfix Metal Access Panel**

**Specification**

The panel is manufactured from 0.9mm Zintec steel. It has a fully removable door and is powder coated RAL9010 30% Gloss. The door is fitted with a screw pin lock and is lockable using a standard budget lock

The Flipfix device covers all plasterboard from 8mm- 32mm so can be used on double board.

**3 Minute Fitting**

- Cut out the hole using template provided and a pad saw
- You don't need to remove the door, just open the panel using the key supplied and place the panel into the aperture.
- Tighten the flip fix device via the fixing screw behind the door leaf to clamp onto the back of the plasterboard (the flipfix device covers all boards from 8mm – 32mm). You can alternatively screw through the frame using optional fixing points if screwing into existing timber surround.
- Lock the door and insert the plastic bung cover into the lock hole.

Now sit back and relax, you have saved yourself 20 minutes
