

ANDERSEN

BEAUTIFUL ELECTRIC CAR CHARGEPOINTS

www.andersen-ev.com

ANDERSEN

THE ROAD AHEAD. Come with us on a journey. Carefully designed, beautifully made.
Uncompromising quality and style. A charge point worth driving home to.

CHARGE IN STYLE

The Andersen A1 charge point is built around simplicity and style.

A commitment to both beauty and functionality results in an outstanding technology product that is a joy to use. Our focus on looks also incorporates a design-led customisation concept. Five core colours can be arranged in 40 combinations and are available in a range of sleek metal and wood finishes, enabling it to fit perfectly into any home.

Great service ★★★★★

Just had a box fitted by Andersen. Great service, on time, solved an electrical problem without fuss. The charger looks great on the outside of the house and is very easy to use. I would recommend this company to others without hesitation.

Peter from Bolton Dec 2017

BEAUTIFUL AND SMART

Inside, the charge point is just as design-driven. Subtle style is matched with elegant functionality. The Andersen A1 is compatible with all electric and plug-in vehicles.

DURABLE FINISH

Andersen products look and feel beautiful. Exterior metal panels are nylon-coated for durability while the hand finishing process ensures a smooth, even colour.

WEATHER PROOF

Tested in temperatures as low as -25C, the unit will perform with maximum efficiency whatever the weather.

COMPACT SIZE

The ergonomic unit is elegant and discreet (measuring 490mm x 345mm x120mm).

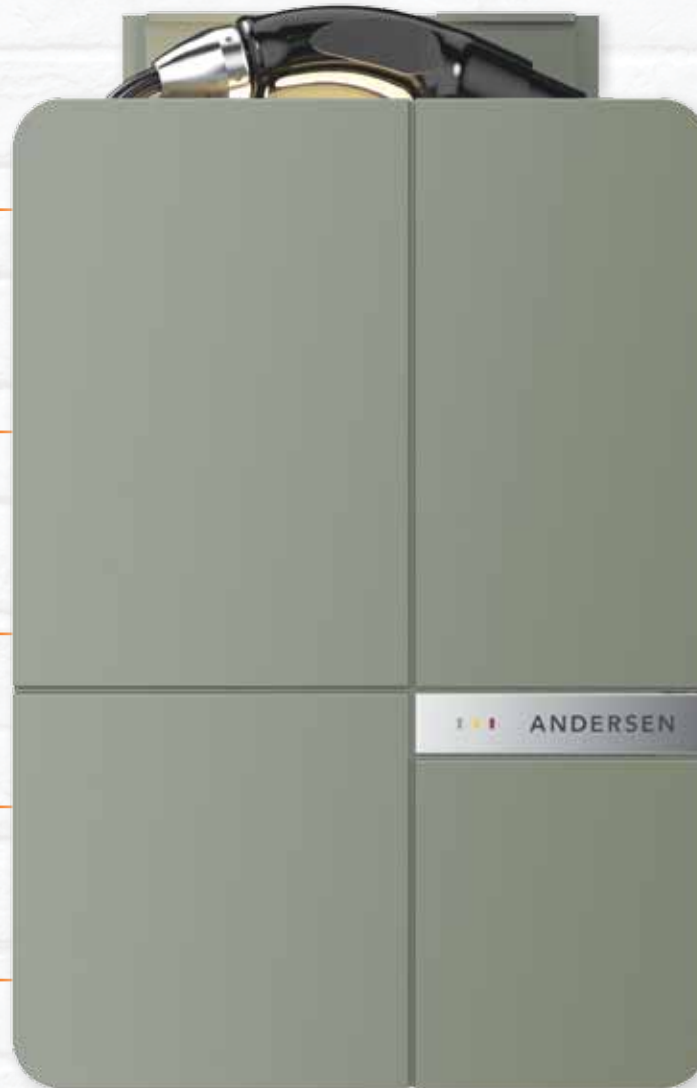

FAST CHARGING

7kW charging. Type 1 or type 2 available.

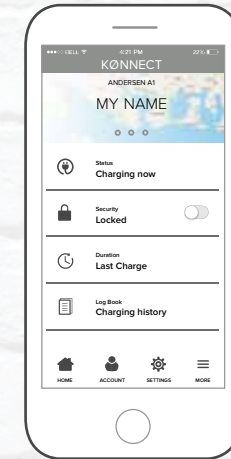

IP RATING

All weather IP64 rated control system to EN60529.

Keep on Track

Secure your charge point, monitor charging progress and track energy usage and costs, all from your iOS and Android smartphone.

Andersen products look and feel beautiful. Exterior metal panels are nylon-coated for durability while the hand finishing process ensures a smooth, even colour.

WEATHER PROOF

Tested in temperatures as low as -25C, the unit will perform with maximum efficiency whatever the weather.

COMPACT SIZE

The ergonomic unit is elegant and discreet (measuring 490mm x 345mm x120mm).

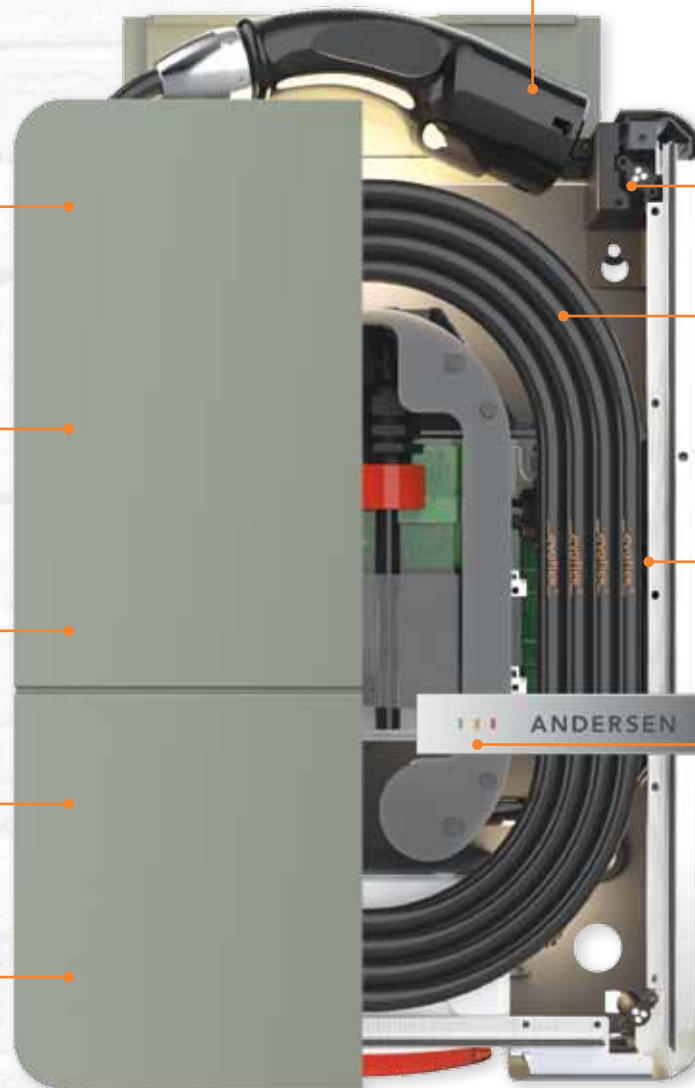

FAST CHARGING

7kW charging. Type 1 or type 2 available.

IP RATING

All weather IP64 rated control system to EN60529.

PLUG COMPARTMENT

The compartment stores the plug neatly whilst keeping it clean. Magnetic lid allows easy access and a nice finishing touch.

INSTALLATION

Designed for easy wall-mounted installation.

evoflek[™]

EVOFLEK[™] CHARGING CABLE
At 4.8 metres, lightweight and highly flexible, our custom designed cable promises easy handling.

CLEANING

Tiny brushes positioned inside the unit clean the cable each time it is wound away.

LIGHTING

An LED display on the front panel indicates charging status. Interior lighting helps keep it simple and easy to use.

GUARANTEED TO LAST

Made of solid aluminum and stainless steel, our chassis comes with a lifetime guarantee.

COLOURS AND FINISHES

Front and side panels are available in five different colours. The panels can be matched, or arranged in different colour combinations. The Andersen A1 is also available in three shades of natural wood, made from low maintenance, sustainable Accoya®

Putty Stone

Stanton Green

Malmö Blue

Maple Red

Nearly Black

Cotswold Oak

Sarong Teak

Charcoal

INNOVATIVE MATERIALS ACCOYA®

Sustainably sourced, high-performance Accoya® timber is more commonly put to the test in bridge building or on a ship's decks. Andersen use Accoya® to create a stylish finish for the A1's front panel. Available in three translucent shades, all with a visible grain, Accoya® wood units are naturally beautiful and made to last.

The Andersen Difference

Our philosophy is simple: function and design of the highest quality to make modern life enjoyable.

Our product is built for the long term with superior components and a hand-crafted finish.

Committed to the principles of craftsmanship and sustainability, we make every Andersen A1 to order in our UK factory.

Design a charge point to match your home

From modernist town houses to charming coastal cottages, the Andersen A1 can be personalised to match the unique style of any home. Select from a range of metal finishes and natural woods.

Design Driven

Andersen has partnered with celebrated London design studio Paul Crofts.

The A1 draws on Croft's signature style of clean minimalism to create a product that is at once functional and stylish.

ABOUT US

We believe even the simplest daily task has the potential to be a refined experience. From the stylish wall-mounted box to the fold away cable and convenient app, each element of Andersen's well crafted A1 has been designed to smooth the journey.

David Simpson – Technical Director (Co-Founder)

An experienced entrepreneur, David has a tireless interest in the intersection of design and technology. He strongly believes that technology needs to not only make life easier but be elegant too.

Jérôme Faissat – Director (Co-Founder)

Jérôme has long been fascinated by the influence of technology on the way we live and work. He now employs that curiosity to drive delivery of Andersen's operations and customer service.

Mandy Simpson – Director (Co-Founder)

A graduate of St Martin's College of Art, Mandy has an inventive, forward thinking approach to solving the challenges of today's consumers. She has set her design principles around a perfect confluence of beauty and functionality.
