

Case study – Dunnings Mill housing development, East Grinstead

Sivalbp® pre-weathered cedar is the natural choice at Barratt Homes housing development

Over 1,000m² of Sivalbp® pre-weathered cedar cladding, supplied by the UK's leading manufacturers and distributors of natural timber cladding, Vincent Timber, has provided the perfect finish to twelve stylish new family homes at the Dunnings Mill housing development, East Grinstead. Vincent Timber, has provided the perfect finish to twelve stylish new family homes at the Dunnings Mill housing development, East Grinstead.

Built for Barratt Homes, part of one of the UK's largest residential property developers, the development is located in High Weald – designated as an area of outstanding natural beauty. And with a company ethos to build 'sustainable developments and communities where people aspire to live', Sivalbp® pre-weathered cedar proved to be the natural choice to clad twelve prestigious new homes.

Supplied to site by an approved Vincent Timber local distributor over a six month period, the project has once again proven Vincent Timber's ability to deliver naturally durable cedar cladding with a pre-weathering oiled coating to produce the look of natural ageing.

French timber cladding producer Sivalbp® produces an extensive range of timber lines at its ultra-modern production facility. The range of Western Red Cedar cladding used for Barratt Homes is also supplied fully certified by the PEFC (Programme for the Endorsement of Forest Certification) – the world's largest forest certification system.

Vincent Timber prides itself on blending traditional family values with modern production practices, a concept perfectly demonstrated at Dunnings Mill where the company helped to transform the appearance of twelve contemporary family homes with the simple addition of a pre-weathered cedar cladding finish.
