

CASE STUDY

Sutherland Building, Northumbria University

Sutherland Building

NEWCASTLE-UPON-TYNE, UNITED KINGDOM

Type
Outdoor

Duration
2 week

When
2018

Size
178m²

We worked with ESH Construction to deliver this living wall to it's high standard and provide an element of biophilic design to the students and staff at the university. ESH is a company that has a very community-focused approach to construction, supporting the local economy and environment - something that is important to us!

Having installed a living wall on the same campus in 2017, we were chosen to install another living wall based on a very different design. This impressive living facade included bird and bat boxes to bring a bit of biodiversity to the campus and create a home for the local wildlife.
