

CASE STUDY

Twickenham Stadium

Twickenham Stadium

RICHMOND-UPON-THAMES, LONDON

Type
Outdoor

Duration
2 weeks

When
2019

Size
183m²

The London Borough of Richmond-upon-Thames granted planning for the major extension of the largest dedicated rugby stadium in the world. The East Stand extension was designed by KSS and we worked with Mace to deliver on the green infrastructure.

ANS designed, supplied, installed and currently maintain this 180m² expanse of plants at Twickenham Stadium. Stadiums are too often dull, concrete blots on the landscape, so we were pleased to have the opportunity put our stamp of greenery here.
