

Command COM4

Integrated intelligent detector/photocells

Whitecroft
lighting

Overview

- Integrated detector
- Programmable via the COMAP and COMPTC programmer
- Regulating photocell ensures minimum maintained light level taking into account the contribution from adjacent luminaires and daylight
- Maximum range of 6m ? (based on 2.5m mounting height)
- 5-35 minute time delay including 10 second walk test
- Remote switching via hand held controller
- Wall switch override to adjust light level or turn luminaires on or off (COM4 only)
- Can control in a master and slave arrangement - contact our Technical Desk for further information
