

WOOD BLOcX

LANDSCAPING

WoodBlocX Retaining Walls

DESCRIPTION

WoodBlocX retaining walls are cantilevered using internal buttresses and can retain up to 1050mm of earth.

WoodBlocX structures are joined with many dowels to create a rigid structure that can withstand tension forces (each dowel joint will withstand up to 0.9 tonnes of shear force in our tests)

massive rigid foundations are not required.

DIMENSIONS

Various size options available on request.

NBS SPECIFICATION

D41 crib walls, gabions and other gravity retaining walls

510 timber retaining wall systems

Product reference - WBX-017

PRODUCT CAPPING OPTIONS

Standard (W 100mm x H 50mm)

Flush (W 75mm x H 50mm)

MATERIAL

FSC accredited Scottish pine.

Available in Accoya®
