

ANEMOSTAT METAL LOUVRES

FDLS INVERTED SPLIT Y LOUVRE - NON VISION

Each side of the FDLS louvre fastens directly onto the door through countersunk mounting holes, this enables it to be used on doors ranging from 29mm up to any thickness.

Material: 18GA. Galvanised Steel - Frame and louvre blades.

Finish: Galvanised steel grey primed - other finishes available to order, including Grade 304 and Grade 316 stainless steel.

Door thickness: To suit 29mm minimum thick metal or timber doors.

Free air flow: 50% free area. (36.6% when using insect mesh).

Aesthetics: Tight mitred corners, no visible welds, and countersunk mounting holes.

Louvre mesh: Insect and bird mesh available, see page 109.

Special security fasteners available (see page 110).
